

LINKING STUDENT PERFORMANCE LEARNING

DIRECTIONS

Generate and share a suggested list of resources on classroom activities that teachers can use to enhance student self-directed learning.

The form consists of a large rounded rectangular container. On the left side of this container, there are three small circles, one near the top, one in the middle, and one near the bottom. Each circle is positioned at the start of a horizontal line that spans the width of the container. These lines are spaced evenly down the page, providing a structured area for writing a list of resources.
